Foreword

I am pleased to note that the Directorate of Economics & Statistics (DES) has come out with its second issue of the most important and valuable publication "**Estimates of State Domestic Product of Uttaranchal-1993-94 to 2003-04**".

In November 2004, DES Uttaranchal introduced the first publication of Estimates of State Domestic Product of Uttaranchal (1993-94 to 2001-02). This second issue represents the estimates of GSDP & NSDP by industries of origin, both at current and constant prices from 1993-94 to 2003-04 including growth rate and sectoral contribution. Besides this disaggregated estimates for each sector and inter state comparison of per capita income of major states are also presented in this publication.

I hope estimates published in this issue would be helpful to policy makers, research workers and decision making authorities.

I place on record my deep appreciation of sincere efforts of the officers & staff member of the Directorate of Economics & Statistics.

Dehradun.

Preface

The State Domestic Product (SDP) representing the value of goods and services produced within the geographical boundaries of the state in a particular year is one of the most important indicators to measure the economic growth of state. The per capita income measures the standard of living of the people.

This issue is the second publication of Estimates of State Domestic Product of Uttaranchal. It contains the revised estimates of GSDP, NSDP & per capita income from 1993-94 to 2001-02, provisional estimates for 2002-03 and quick estimates for 2003-04 along with the brief analysis of the estimates. Provisional estimates from 1993-94 to 2001-02 have been revised introducing revised rates of consumption of fuel wood per person per year for Uttaranchal received from quinquennial surveys on consumption expenditure conducted by NSS 50th round (1993-94) & 55th round (1990-2000).

The co-operation extended by the Central Statistical Organization and all the state government departments in furnishing the required data for preparation of the estimates is gratefully acknowledged.

I am happy to record my appreciation of the concerning officers & staff member of the Directorate of Economics & Statistics.

I

The GSDP / NSDP ESTIMATES

The provisional estimates of GSDP/ NSDP and Per Capita NSDP at current and constant (1993-94) prices for the year 1993-94 to 2003-04 are as follows:

Table1: Estimates of GSDP/ NSDP and Per Capita Income
at Current and Constant (1993-94) Prices

Year	GSDP (Rs. Crore) at		Per Capita GSDP at (Rs.)		NSDP (Rs. Crore) at		Per Capita NSDP at (Rs.)	
	Current Prices	Constant Prices	Current Prices	Constant Prices	Current Prices	Constant Prices	Current Prices	Constant Prices
1	2	3	4	5	6	7	8	9
1993-94	5686	5686	7674	7674	5109	5109	6896	6896
1994-95	6914	6187	9158	8195	6236	5564	8260	7369
1995-96	7529	6174	9789	8028	6726	5509	8746	7163
1996-97	8242	6571	10520	8388	7312	5856	9334	7476
1997-98	8984	6689	11262	8384	7946	5927	9961	7429
1998-99	9946	6800	12245	8371	8812	5999	10848	7385
1999-00	10724	6856	12967	8290	9464	6001	11443	7256
2000-01	12237	7591	14537	9017	10828	6636	12863	7883
2001-02	13181	8041	15384	9385	11538	6986	13466	8154
2002-03	15064	8858	17289	10167	13023	7575	14947	8694
2003-04	17370	9900	19598	11170	15051	8491	16982	9580

It can be seen from the above table that the estimates of GSDP/ NSDP and Per Capita NSDP at current prices which were Rs. 5686 crores, Rs. 5109 crores and Rs. 6896 respectively during 1993-94 have gone up to Rs. 17370 crores, Rs. 15051 crore and Rs. 16982 at current prices, it means that these estimates have respectively gone up by approximately 205%, 195% and 146% in 2003-04. Whereas at constant prices i.e. setting aside price fluctuation, these estimates are Rs. 9900 crores, Rs. 8491 crores and Rs. 9580 respectively in 2003-04. Thus, it is clear that even at constant prices the GSDP, NSDP and Per Capita NSDP have gone up by 74%, 66% and 39% respectively.

REVIEW OF GROWTH IN STATE'S ECONOMY **AT CONSTANT (1993-94) PRICES**

Although the above mentioned percentage increases reflect an overall growth of economy, it is necessary to analyse the year wise performance. The year wise growth in GSDP, NSDP and Per Capita Income (NSDP) at constant (1993-94) prices from 1994-95 to 2003-04 in percentage terms is presented in Table –2.

Table- 2: Yearly Growth in GSDP, NSDP and Per Capita GSDP/ NSDP at Constant (1993-94) Prices.

Year	Percentage Growth Over Previous Year at Constant Prices			
	GSDP	Per Capita GSDP	NSDP	Per Capita NSDP
1	2	3	4	5
1994-95	8.83	6.79	8.90	6.86
1995-96	-0.21	-2.04	-0.98	-2.80
1996-97	6.43	4.49	6.30	4.36
1997-98	1.79	-0.05	1.20	-0.62
1998-99	1.66	-0.15	1.21	-0.59
1999-00	0.83	-0.96	0.03	-1.75
2000-01	10.71	8.77	10.59	8.65
2001-02	5.94	4.08	5.28	3.43
2002-03	10.16	8.33	8.43	6.63
2003-04	11.76	9.87	12.09	10.19

It can be seen from the table-2 that the Uttaranchal's economy witnessed highest growth in the year 2003-04 and the lowest growth in the 1995-96; infact it was negative in 1995-96. Highest growth in 2003-04 is mainly due to the rapid performance of communication and other service sector during the year.

SECTORAL SHARES OF GSDP DURING 1993-94 & 2003-04

Table-3 has been prepared to analyse the share of the three broad sectors of the economy in the GSDP.

Table-3: Sectoral Share of GSDP during 1993-94 and 2003-04

Sector	1993-94		2003-04	
	At current prices (Percent)	At constant prices (Percent)	At current prices (Percent)	At constant prices (Percent)
1	2	3	4	5
Primary	40.10	40.10	30.65	30.79
Secondary	23.36	23.36	25.62	25.94
Tertiary	36.54	36.54	43.74	43.27
Total GSDP	100.0	100.0	100.0	100.0

From Table–3, it can be observed that considerable changes in the sectoral composition of GSDP has been taken place. While in 1993-94 the major contributor was the primary sector, in 2003-04 it was tertiary sector. This gives an idea that Uttaranchal’s economy is growing in similar terms with the global economy where service sector is likely to play a major role.

II

THE ANALYTICAL REVIEW

The estimates of Gross/ Net State Domestic Product at current and constant prices with base year 1993-94 have been prepared from 1993-94 to 2003-04 on the basis of latest available data. The analysis and salient features of these estimates are detailed below.

1. SECTORAL ANALYSIS

The overall view of sectoral composition of state economy at current prices for 1993-94 and 1996-97 to 2003-04 is tabulated at table-4 and its graphical representation is depicted at Fig.-3.

**Table 4: Sectorwise Percentage Contribution of GSDP
at Current Prices**

Sector	1993-94	1996-97	1997-98	1998-99	1999-00	2000-01	2001-02	2002-03	2003-04
1	2	3	4	5	6	7	8	9	10
Primary	40.10	38.74	37.97	38.93	40.08	37.98	33.92	31.79	30.65
Secondary	23.36	23.70	23.34	21.52	19.85	21.51	23.77	25.95	25.62
Tertiary	36.54	37.56	38.69	39.54	40.07	40.51	42.31	42.26	43.74
Total	100.00	100.00	100.00	100.00	100.00	100.00	100.00	100.00	100.00

Note: Rounding off has been done.

The contribution of the primary sector, which was 41.10% during 1993-94 has come down to 30.65% in 2003-04. Whereas, the contribution of the secondary sector recorded at 23.36% in 1993-94, has gone up to 25.61% in 2003-04. On the other hand, contribution of tertiary sector worked out 36.54% in 1993-94 has ascended to 43.74% in 2003-04.

The analysis of sectoral contribution in Gross State Domestic Product (GSDP) at current prices reveals that the contribution of primary sector comprising of Agriculture, Livestock, Forestry, Fishing, Mining & Quarrying is decreasing. The contribution of secondary sector comprising of Manufacturing, Electricity, Gas & Water Supply and

Construction and tertiary sector, also called the services sector comprising of Trade, Hotels & Restaurants, Transport, Storage, Communication, Banking & Insurance, Real Estates, Business Services, Public Administration and Other Services is increasing more or less regularly.

It is clear that the share of primary sector is decreasing, while the share of tertiary sector in GSDP is increasing. Whereas, the share of primary sector has gone down by 9.4 points in the reference period, the share of tertiary sector has gone up by 7.2 points.

Sectoral composition (Table-5) of state economy at constant (1993-94) prices for 1993-94 and 1996-97 to 2003-04 is tabulated at table-5 and its pictorial representation is depicted at fig.-4 .

Table-5: Sectorwise Contribution of GSDP at Constant Prices

Sector	1993-94	1996-97	1997-98	1998-99	1999-00	2000-01	2001-02	2002-03	2003-04
1	2	3	4	5	6	7	8	9	10
Primary	40.10	37.86	37.22	38.67	38.30	35.47	32.95	30.66	30.79
Secondary	23.36	24.77	23.10	21.46	20.40	22.92	24.79	26.95	25.94
Tertiary	36.54	37.38	39.67	39.86	41.30	41.61	42.26	42.40	43.27
Total	100.00	100.00	100.00	100.00	100.00	100.00	100.00	100.00	100.00

Note: Rounding off has been done.

Sectoral composition of GSDP at constant (1993-94) prices also indicates the same trend as that of current prices but with slight variation in percentages. During 2003-04, contribution of primary, secondary and tertiary sector are 30.79%, 25.94% and 43.27% respectively, while in 1993-94 their contribution was 40.10%, 23.36%, and 36.54% respectively.

The reasons for change in the sectoral composition of Uttaranchal's economy may be attributed to the urbanization and consequential stability in agricultural production on one hand and substantial increase in activities pertaining to the service sector on the other.

2. THE GROSS STATE DOMESTIC PRODUCT

GSDP at current and constant prices have registered annual compound growth rate of 11.8% and 5.7% respectively during the reference period i.e., from 1993-94 to 2003-04. In absolute terms the GSDP at current prices has grown from Rs. 5686 crores in 1993-94 to Rs. 17370 crores in 2003-04 and the GSDP at constant prices has grown from Rs. 5686 crores in 1993-94 to Rs. 9900 crores in 2003-04. The macro analysis based on indices reveals that GSDP at current prices from primary sector has increased more than double and from the secondary & tertiary sectors it has increased more than triple during the reference period. GSDP at constant prices from primary, secondary and tertiary sectors has grown by 34%, 93% and 106% respectively. Thus, it is clear that the tertiary sector is growing at comparatively better rate than primary and secondary sector. Significant improvements have taken place in the Communication, Banking & Insurance and Construction sector. GSDP at current and constant prices (Table-6) and its graphical representation (Fig.-3) is depicted here under.

Table-6: GSDP at Current & Constant (1993-94) Prices
(Rs. crore)

GSDP	1993-94	1996-97	1997-98	1998-99	1999-00	2000-01	2001-02	2002-03	2003-04
1	2	3	4	5	6	7	8	9	10
Current	5686	8242	8984	9946	10724	12237	13181	15064	17370
Constant	5686	6571	6689	6800	6856	7591	8041	8858	9900

3. THE NET STATE DOMESTIC PRODUCT/ STATE INCOME

In absolute terms the NSDP at current prices has grown up from Rs. 5109 crores in 1993-94 to Rs. 15051 crores in 2003-04 and NSDP at constant prices has grown from Rs. 5109 crores in 1993-94 to Rs. 8491 crores in 2003-04. NSDP at current and constant prices have recorded annual compound growth rates of 11.4% and 5.2% respectively during the reference period. The micro analysis of NSDP based on indices reveals the same trend as GSDP. It has increased more than double in case of Primary sector, while it has gone up approximately three times in case of Secondary

and Tertiary sector. NSDP at constant prices from Primary, Secondary and Tertiary sector has grown by 34%, 57% and 109% respectively. NSDP at current and constant prices (Table-7) and its graphical representation (Fig.-4) is depicted here under.

Table-7: NSDP at Current & Constant (1993-94) Prices
(Rs. crore)

NSDP	1993-94	1996-97	1997-98	1998-99	1999-00	2000-01	2001-02	2002-03	2003-04
1	2	3	4	5	6	7	8	9	10
Current	5109	7312	7946	8812	9464	10828	11538	13023	15051
Constant	5109	5856	5927	5999	6001	6636	6986	7575	8491

4. PER CAPITA INCOME IN THE STATE

The estimates, when studied in relation to the total population of the state, indicate, the level of per capita net output of goods and services available or standard of living of the people in the state. The estimates of per capita income both at current and constant (1993-94) prices are presented in Table-9 and depicted in Fig.-5

Table-8: Per Capita Income

(Rupees)

Prices	1993-94	1996-97	1997-98	1998-99	1999-00	2000-01	2001-02	2002-03	2003-04
1	2	3	4	5	6	7	8	9	10
Current	6896	9334	9961	10848	11443	12863	13466	14947	16882
Constant	6896	7476	7429	7385	7256	7883	8154	8694	9580

Annual compound growth rate of GSDP, NSDP and Per Capita Income at current prices during the reference period are 11.9%, 11.4% and 9.4% respectively. Thus, it is clear that state's economy is growing at relatively higher rate but the percolation of benefits of its growth to the population is getting affected due to higher population growth. In other words, the physical quality of life in the state is not improving at the rate of growth of the economy.
